If King Arthur actually existed, many historians place him as a war leader seeking to halt the invasion of the Saxons after the fall of Rome. There are many indications that England did, after a time of much strife, have a brief period of peace and prosperity in what is now called "the Dark Ages". This sword is of a type that was widely in use during this period and would be what a hard fitting warrior would prefer. Nicely balanced, well tempered high carbon steel sharp blade offset with antiqued brass parts.

Period scabbard included.

Product parameters:

- Blade length: 94 cm
- Total length: 79,4 cm
- Weight: 1,24 kg
- Steel: 1065
- Blade width: 4,1 cm
- Blade thickness: 4,8 mm
- Type: sharpened
